DD/R - ORGANIZATION

8 Feb 1963

DDCI action memo A-178 reported decisions:

25X1

No revision of [redacted] As recommended by the PFIAB, the DD/R mission shall include responsibility for research in "advanced fields of interest to intelligence." The pioneering, long-range research in life sciences and behavioral fields falls within the scope of this recommendation. Do not consider this function to be in conflict with current guidelines established in [redacted] as DDR can continue to conduct broad "pure research" in this field without getting involved in item-oriented research in support of agent operation.
